PROFESSIONAL SUMMARY

Computer Science postgraduate with over two years of professional experience as a Full Stack Software Engineer, specializing in scalable web systems, backend development, and cloud-based deployments. Through industry exposure, I developed a strong interest in Artificial Intelligence and data-driven systems, motivating my decision to pursue **postgraduate training** in Artificial Intelligence. Seeking focused academic training in machine learning, intelligent systems, and applied data analytics to transition into AI-enabled software and data-oriented roles.

CORE COMPETENCIES

- Programming & Computer Science Foundations:** Java, Python, JavaScript, PHP, JSP, REST APIs, Scalable System Design
- Data, Databases & Backend Engineering:** SQL, MySQL, PostgreSQL, API Development, Data Modeling, Query Optimization
- Software Quality, Testing & Productivity:** AI-Assisted Development, Playwright, Code Optimization, Refactoring
- Cloud, DevOps & Deployment:** Cloudways, cPanel, Cloudflare, CLI, FTP/SFTP, Deployment Pipelines
- Full Stack & Web Development:** WordPress (Custom Plugins & Themes), HTML5, CSS3, React (Basic)
- Application & Mobile Development:** Android Development, Web Applications (E-commerce, Logistics)
- Tools, Platforms & Development Environment:** Git, GitHub, Postman, VS Code, Android Studio, IntelliJ, Figma
- Client Collaboration & Technical Delivery:** Requirements Gathering, Solution Design, Documentation, Delivery Lifecycle

PROFESSIONAL EXPERIENCE

Organisation, India	Designation	Duration
WisdmLabs, India	Software Engineer	Jan 2024 - Present

@Software Engineer

- Collaborated directly with clients to gather requirements, architect solutions, and deliver scalable, high-performance web products
- Developed and customized WordPress themes and plugins, managing full website lifecycle including hosting, security, and optimization
- Built and integrated backend services using Java and Python, gaining practical exposure to data processing, API-driven architectures, and scalable system workflows relevant to AI-enabled applications
- Designed and optimized SQL databases (MySQL, PostgreSQL) by writing efficient queries, implementing schemas, and improving performance
- Handled cloud deployment and site management using Cloudways, Cloudflare, FTP (FileZilla), and CLI-based server operations
- Implemented end-to-end automated testing using Playwright to validate UI workflows and improve release stability
- Leveraged AI-assisted development tools (Cursor IDE, Claude) for intelligent debugging, code optimization, and secure code review
- Translated business requirements into scalable technical implementations with clean, maintainable, and modular code architecture
- Managed multiple product deployments, performance enhancements, bug resolution, and production support with high client satisfaction
- Representative Projects:** [YSI-NET](#), [12minprep](#), [WisdmLabs](#)

KEY PROJECTS

AI Chatbot System (Conversational Support & Automation):

- Built an intelligent chatbot service with third-party API integration and context-aware responses
- Engineered backend workflows for intent handling, conversation mapping, and response accuracy
- Implemented automated testing and validation for conversational reliability
- Enhanced user engagement with structured and dynamic response logic
- Gained practical exposure to conversational AI concepts, intent classification, and applied NLP-oriented system design

YSI-INET (Enterprise Web Platform):

- Architected and developed WordPress-based platform with custom theme and plugin enhancements
- Integrated secure backend services with optimized SQL database operations and structured data flow
- Managed deployment, hosting, CDN, and security configurations using Cloudways and Jetpack
- Improved platform performance through caching strategies, query optimization, and resource handling

12MinPrep (EdTech Learning Platform):

- Developed and customized dynamic learning modules with scalable WordPress architecture
- Implemented feature enhancements, REST API integrations, and backend automation
- Optimized system performance and database queries to support seamless content delivery
- Managed site reliability, deployments, updates, and production monitoring

CERTIFICATIONS & ACADEMIC ENRICHMENT

- **Google Data Analytics Professional Certificate (Coursera):** Data analysis, visualization, and insights
- **R Programming Certification (Coursera):** Statistical computing, data manipulation, and analysis
- **UX Design Certification (Coursera):** User research, wireframing, and interface design principles

Key Highlights

- Delivered multiple client projects with high satisfaction by translating requirements into scalable technical solutions
- Improved platform reliability and release stability using automated E2E testing with Playwright
- Enhanced development efficiency through AI-assisted workflows and optimized debugging
- Optimized database performance using advanced SQL query improvements and indexing strategies
- Successfully delivered production-ready platforms including YSI-INET, 12MinPrep, and AI Chatbot system
- Managed full deployment pipelines including hosting, security, CDN, and server configurations

EDUCATION

- **Master of Science (MSc) in Computer Science** | Fergusson College, Pune, Maharashtra, India | 2022 to 2024 (79.75%)
Relevant Coursework:
Data Structures, Algorithms, Database Systems, Software Engineering, Operating Systems, Computer Networks, Android Application Development
- **Bachelor of Science (BSc) in Computer Science** | Fergusson College, Pune, Maharashtra, India | 2019 to 2022 (83.5%)
